Obj-C

2012 -> | Kakappo / Fluito AS

Private projects developing mobile apps.

Swift, React Native, Xamarin, Obj-C, Vipps Login, Vipps Payment, Back4App, SendGrid, Node, .NET Core

Projects

Through my professional career I've worked on numerous projects and for several different clients:

Client	Project	Description	Link
Byks	Byks – Better Workouts	Byks is a platform for workouts and training plans where content creators can monetize on their content. React Native apps, website created with Remix and a CMS created bottom up with React and Tailwind. All powered by a Node API, Prisma and PostgreSQL.	Byks.io
Brevio	Brevio.com	B2B services for auditors aiding in information flow and signing of documents. Created with React, Ruby on Rails and PostgreSQL.	Brevio.com
SATS	Member app	Lead iOS developer on app with ~500k users for supporting SATS members before, under and after workouts. App is written in Swift with UIKit and SwiftUI. Integrated with Transifex for translations, and CircleCI for automatic build and deploy.	AppStore
Sport 1	Exhibition portal	Internal application for Sport 1's retailers for ordering goods on exhibitions. Created with .NET Core, MSSQL and React.	
Innovation Norway	Business Norway	A matching portal for businesses and investors for new Norwegian solutions and technology. A solution created with .NET, EPiServer, MSSQL and React.	BusinessNorway.no
Eltek	Eltek.com	A business site for showcasing products and provide technical information for products. Built with .NET and EPiServer.	Eltek.com

Client	Project	Description	Link
Stokke	Scoot Smile	An iOS app created as part of a marketing campaign for a new stroller for Stokke. The app recorded the baby's face with the front camera and whenever the baby smiled, the app took a picture with the back camera to save what made the baby smile.	
Regnskap Norge	Quality Control	A web application created for accountants to help with validating and controlling clients on-site. Created with .NET, EPiServer and Knockout.js	
Stortinget	Stortinget.no	A web portal with over 300k pages of information built with .NET and EPiServer.	Stortinget.no
Skedsmo (Lillestrøm) Municipality	Skedsmo.kommune.no	Migrating old EPiServer site to new EPiServer site	
Rikskonsertene (Kulturtanken)	Lyderia	A gamified music learning platform for school kids for web, and also wrapped in a hybrid app experience with PhoneGap.	Lyderia
GMC Eiendom	Byfjordparken.no	A site for a housing project for displaying and selling apartments created with .NET and EPiServer.	Byfjordparken.no
Innovation Norway	VisitNorway.no	A site for helping tourist to find what to explore and do in Norway. Also development on their mobile app with Xamarin.	VisitNorway.no
Avinor / TV2	Fly med oss	A project where a helicopter was followed live from airport to airport in Norway. Developed the map module that integrated with the video player delivered by Stargate Media for displaying live information about where the helicopter was and what happened on the different locations.	Fly med oss promo

Client	Project	Description	Link
Regnskap Norge	Pintell	A tool / wizard for helping accountants do accounting created with .NET and EPiServer	

Education

2008 - 2013 | NTNU | Master of Science - Computer Science

2005 - 2006 | Voss Folk High School | Music- and sound production

2002 - 2005 | Jessheim High School | General subjects
